

# Vedant Mehta

San Jose, CA | (408) 210-4672 | mehtavedant8@gmail.com | linkedin.com/in/vedantmehta14/

## EDUCATION

### Master of Science in Software Engineering

Aug 2024 – May 2026

San Jose State University, San Jose, United States

Coursework: Deep Learning, Enterprise Software Platforms, Enterprise Distributed Systems, Data Mining

### Bachelor of Technology in Computer Science and Engineering

Oct 2020 – June 2024

Nirma University, Ahmedabad, India

Coursework: Machine Learning, Cloud Computing, Data Structures and Algorithms, Database Management Systems, Operating Systems, Object Oriented Programming, Computer Networks, Big Data Analytics, Information Retrieval Systems

## SKILLS

**Programming:** Python, Java, JavaScript, TypeScript, C++, C, SQL

**Web Technologies:** HTML/CSS, ReactJS, NodeJS, ExpressJS, Django, Flask, Streamlit, Bootstrap, AJAX, jQuery

**Machine Learning Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Keras, TensorFlow, PyTorch

**Virtualization & Version Control:** Git/GitHub, AWS, GCP, Docker, Kubernetes, Kafka

**Databases:** RDBMS, MySQL, MongoDB, Firebase, SQLite

## EXPERIENCE

### Software Engineer Intern, Techsture Technologies | Ahmedabad, India

Jan 2024 – May 2024

- Designed and implemented a custom ERP system for organization's intranet network using Django framework
- Streamlined multiple HR functions like pay-slip generation, attendance tracking, event management, task management, and leave approval into the ERP system improving operational efficiency by 30%
- Implemented role-based access control and multi-factor authentication to ensure secure access to organization's portals and enhancing data protection

### Summer Intern, Northern Trust | Pune, India

June 2023 – Aug 2023

- Surveyed about possible utterances (keywords) entered by user for a particular workflow of a virtual agent chatbot on the ServiceNow platform
- Integrated Natural Language Understanding into existing workflows enabling automatic workflow execution by recognizing intent of user based on utterances
- Developed functionality in JavaScript to monitor and verify real-time status of critical services, including Microsoft services and company specific applications, displaying service availability and error notifications

## PROJECTS

### Cloud IDE | MERN, WebSocket, AWS S3, GCP, Docker, Kubernetes

Oct 2024 – Nov 2024

- Built a secure collaborative cloud IDE with real-time multi-user code editing and an integrated AI assistant that provides contextual coding suggestions based on project-specific files, enhancing user productivity
- Developed authentication, resource provisioning, and coding-interface microservices and deployed them on Google Cloud Run using Docker images, to manage user access and resource allocation
- Deployed an automated container orchestration system using Google Kubernetes Engine that scales user environments on-demand, ensuring resource isolation through dedicated containerized environments, and optimal performance for multiple concurrent users
- Integrated WebSocket communication for seamless real-time collaboration, allowing multiple users to edit and execute code simultaneously

### Docu-LM | ColPali, RAG, OpenAI GPT-4, ReactJS, NodeJS

Oct 2024

- Engineered a document retrieval system using RAG architecture, implementing image based page-level indexing to maintain visual context integrity
- Implemented an advanced document processing pipeline using ColPali for page-level indexing, enabling precise retrieval of contextual information from complex multi-page documents
- Developed a user-friendly React interface allowing users to upload documents, with an intelligent chatbot leveraging GPT-4 to provide comprehensive answers by analyzing charts, graphs, and text together

## LEADERSHIP AND INVOLVEMENT

### Computer Society of India, Nirma University | Executive Member

Nov 2020 – Dec 2023

- Assisted in organizing and executing various hackathons and coding events
- Mentored new club members, helping enhance coding skills and offering general support and guidance

### Hack-NU-thon 3.0 | Virtual Cardiologist

June 2022

- Created a web application interface with Streamlit library in Python and CSS, and leveraged ML models to predict heart disease and provide personalized health recommendation based on user input
- Compared the performance of different ML algorithms like SVM, KNN, and logistic regression and secured an accuracy of 99.02% in random forest algorithm
- Ranked in the Top 5 teams among over 70 teams for innovative implementation and model accuracy
